

Concussion Management Agreement

Coquitlam Metro-Ford Soccer Club and BC Soccer believe in the health and safety of all players and fully support and require all adult players or parental guardians (if player is under 18 years old), to be educated about the signs and symptoms of concussions as per [BC Soccer's Concussion Management Policy](#). All parents and adult players are required to complete the online [NCCP Making Head Way in Sport eLearning](#) module to empower coaches, parents, and participants with the knowledge and skills needed to prioritize participant safety when it comes to concussions. Parents and players have a responsibility to report all concussion-related injuries and illnesses to an independent medical professional. CMFSC reserves the right to limit players' return to the field, based on the aforementioned protocols and professional medical advice.
